Summary

Java Backend / Full Stack Developer with hands-on experience in building scalable, high-performance applications using Java, Spring Boot, and Microservices architecture. Skilled in REST API development, database design, and cloud deployment, CI/CD pipelines. Strong problem-solving abilities with 380+ DSA problems solved, eager to contribute to enterprise-grade software solutions. A strong foundation in DSA, OOP, and system design basics. Passionate about building high-performance and reliable backend systems.

Work Experience

Full Stack Developer Intern

(4 Month's Duration)

Codec Technologies (February 2025 – June 2025)

- Developed collaborative RESTful APIs using Java, Spring Boot, and Hibernate, improving response time by 25%
- Designed and optimized relational databases (MySQL/PostgreSQL) improving query performance
- Built responsive UI using React & Angular, integrating seamlessly with backend APIs
- Implemented CI/CD pipelines (GitHub Actions, Maven, Docker) reducing deployment time by 40%
- Developed real-time features using WebSockets
- Integrated Kafka & Redis for asynchronous processing and caching

Java Developer Intern

softronix software Services Pvt ltd (September 2025 – Present)

- Developed 10+ RESTful APIs using Java, Spring Boot, and Hibernate, improving response time by 25%
- Designed and optimized relational databases (MySQL/PostgreSQL) improving query performance
- Worked on microservices-based backend architecture and API integration communication Implemented CI/CD pipelines (GitHub Actions, Maven, Docker) reducing deployment time and continuous improvement by 40%
- Developed real-time features using WebSockets
- Integrated Kafka & Redis for asynchronous processing and caching

Education

Priyadarshini College of Engineering

Nagpur, India

Bachelor of Technology, Information Technology

2021-2025

CGPA: 7.89

Technical Skills & Certifications

Languages: Core Java, Python, C++

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Microservices, REST APIs, Servlets

Databases: MySQL, PostgreSQL, MongoDB, SQL, NoSQL

Tools: Git, GitHub, Jira, Postman, Eclipse, Spring Tool Suite

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD (GitHub Actions)

Frontend: React.js, Angular, HTML, CSS, JavaScript, UX/UI

Concepts: OOP, SOLID Principles, System Design, problem-solving, SDLC, Design Patterns (MVC, Singleton), JWT Authentication, Agile/Scrum

Projects

Smart AI Email Assistant

Technologies: Spring Boot, Spring AI, Java, React, Node.js, Postman

- Developed an AI-powered email automation system using Spring Boot and React. System that can help with email management and produce smart auto-replies.
- Designed scalable REST APIs following stateless architecture and MVC design pattern and implemented real-time notifications
- Improved performance by 30–40% using Redis caching and message queues, code reviews.
- Automated deployment using Docker, Maven, and CI/CD pipelines (GitHub Actions).

Research Assistant (Chrome Extension)

Technologies: Spring Boot, REST APIs (Postman), HTML, CSS, JavaScript

- Built Chrome extension for content summarization and keyword extraction
- Developed backend services continuous learning using Spring Boot REST APIs and unit tests
- Implemented real-time text parsing and highlighting features
- Designed modular architecture for scalability and maintainability.

Certifications & Achievements

- AWS Cloud Practitioner – Core Services & IaaS/PaaS
- Kotlin & Android App Development – Mobile Software Engineering
- LeetCode Coding Challenge Winner – 380+ algorithm problems solved (Java)
